## Clinical Rotations

---

**The Lung and Sleep Center of North Texas** Pulmonary/Sleep Medicine — North Richland Hills, TX 130 hours

- Evaluated and managed common chief complaints such as shortness of breath, chronic cough, pulmonary nodules, and hypersomnia, as well as COPD, asthma, interstitial lung disease, and obstructive sleep apnea
- Interpreted diagnostic tests including pulmonary function tests, chest CT and radiographs, pleural fluid analysis
- Gained exposure to the management of critically ill and hemodynamically unstable patients requiring mechanical ventilation and vasopressor support in the intensive care unit

**Texas Health Care** Women's Health — Fort Worth, TX 153 hours

- Assessed common complaints, including breast mass, abnormal uterine bleeding, dyspareunia, pelvic pain, and perimenopause for a diverse patient population, ranging from young adult to geriatric
- Counseled patients on gynecologic preventative care during Well Woman exams and on routine prenatal care during obstetrics visits
- Measured fundal height and doppler heart tones, and assisted with in-office procedures (subcutaneous hormone pellet implantation, colposcopy, IUD insertion, LEEP) and surgery (Cesarean section, LAVH)

**JPS Health** Psychiatry — Fort Worth, TX 131 hours

- Constructed treatment plans for patients with schizophrenia and mood disorders in a locked long-term care unit, utilizing findings from extensive chart review, patient interviews, and mental status exams
- Evaluated and dispositioned patients in the psychiatric emergency department with chief complaints such as suicidal ideation/attempt, acute psychosis, and acute mania
- Developed fund of knowledge through self-guided research of neuroleptic malignant syndrome, catatonia, and schizophrenia management

**Texas Health Harris Methodist Hospital** Emergency Medicine — Fort Worth, TX 148 hours

- Gained exposure to the acute care of critically ill patients in a Level 1 Trauma Center and one of the busiest emergency departments in the country
- Assessed patients with a diverse array of acuity levels (ESI 2 to 4) and chief complaints, including altered mental status, falls and motor vehicle collisions, chest pain, abdominal pain, headache, and back pain
- Performed and assisted with procedures including laceration repair, splinting, and fascia iliaca nerve block
